

Form - Binder

ART.NO 50204, 50205, 50209

Elastic binder which provides relief and efficient support for wounds after thoracic and abdominal surgery. Adjustable Velcro front closure makes the product easy to put on and adjust to requested compression. Can be closed right or left side. Form provides a consistent compression around the whole abdomen area and does not affect the patient's ability to breathe comfortably. Available in beige in three different heights 15, 25 & 30 cm.

The product is also suitable to be used as a stoma binder, although consider using a larger size in order to avoid too much compression.

Level of compression: Medium, 2 out of 3.

Indications: To be used in post-surgical treatment, after thorax and/or abdominal surgery in order to prevent pressure on wounds, scar rupture and in the early stages of mobilization of the patient. Can be used for different types of minor hernias. Can also be cut to expose stomas or openings for drainage.

Material: Polyester 77%, Natural Rubber Latex 17%, Polyamide 6%.

Washing instructions: Machine wash at 40°C (104°F) (higher temperature is possible, but reduce the life time of the Velcro). Seal the Velcros. Use washing bag. Do not bleach. Do not dry clean. Do not iron. Do not tumble dry.

Measurement: To determine the correct size, measure abdomen circumference in centimeters, of intended placement.

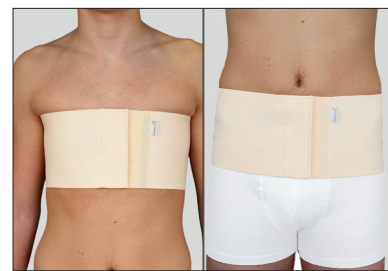

Size	Measurement cm	Art.no Form 15 cm	Art.no Form 25 cm	Art.no Form 30 cm
S	80-95	50209-08-40	50204-08-40	50205-08-40
M	90-105	50209-08-50	50204-08-50	50205-08-50
