

StomiBas - Stoma binder

ART.NO 50210, 50211, 50212

Elastic stoma binder designed to provide support and resistance/ compression in case of parastomal hernia. The unique design allows holes, individually tailored to the ostomy pouch, to be cut in the girdle while maintaining controlled compression over the hernia/stoma. The inelastic material in the front does not fray regardless of the shape and size of the hole, no edging is needed. StomiBas has a handle at the front for easy closure and adjustment.

StomiBas is available in black and grey in three different heights 16, 20 and 25 cm. The wide velcro closure at the front makes StomiBas easy to apply and easy to adjust to the desired compression. Can be closed on both the left and right side.

Level of Compression: Strong, 3 out of 3.

Indications: Mobilization after surgery. Stabilizing girdle for stoma/ostomy hernia. Prevents herniation. Fixation of stoma bandage. **Contraindication:** Incarcerated hernia.

Material: Polyester 64%, Polyamide 22%, Elastane 10%, Polyurethane 4%. Latex free.

Washing instructions: Machine wash 40°C (104°F). Seal the Velcro. Use washing bag. Do not bleach. Do not dryclean. Do not iron. Do not tumble Dry.

Measurements: Measure circumference around intended placement.

50211: 16 cm

50212: 20 cm

50210: 25 cm
