

StomiMini - Stoma binder

ART.NO 50213

Soft fixation band for fixation of ostomy pouch. Apply over the ostomy pouch and against the skin. Easy closure with Velcro in front. The fixation band is made out of a flexible airy elastic material that feels comfortable towards the skin. Size is flexible and can easily be adjusted as the Velcro attaches to the surface of the entire band. In the same way, level of compression can be adjusted as needed. One universal size fits circumference up to 120 cm. The fixation band is discreet and invisible under clothing. Suitable for ostomy on either right or left side. StomiMini is available in black and white. Height 7.5 cm. The fixation band cannot be cut.

Indications: To be used as a stoma band for fixation of ostomy pouches.

Contraindications: Ostomy hernia.

Material: Polyamide 77%, Elastane 13%, Cotton 10%. Latex free.

Washing instruction: Machine wash at 60°C (140°F). Seal the Velcros. Use washing bag. Do not bleach. Do not dry clean. Do not iron. Do not tumble dry.

Size/Measurement: Circumference of intended placement. Universal size, fits circumference measuring up to 120 cm.
