

# Pectus - Corrective corset

ART.NO 50400

Pectus is a corrective corset used in the treatment of so-called keel chest. The corset is tightened around the chest and provides compression (anterior/posterior) towards the chest. The corset is adjustable and the aluminum frame is malleable. Opens and closes with a quick release buckle. Lined with soft padding that can be washed. Universal size.

**Indications:** Pectus carinatum (keel chest).

**Contraindications:** Severe deformations.

**Material:** Low density polyethylene, aluminum, polyester padding. Latex free.

**Washing instructions:** The padding can be washed by hand with mild soap and water. Metal and plastic parts are wiped with soap and water.

**Measurement:** Chest circumference in cm.
