

NeoROM - Stabilizing knee brace

ART.NO 70526

An anatomically stabilizing knee brace in open wrap design. Polycentric hinges provide adjustable flexion and extension ROM stops at selected degrees. Adjustment of the hinge is easily made with a pin and secured under a plastic cover. Extension and flexion can be adjusted and locked at 0o, 15o, 30o, 60o and 90o, or free movement in flexion. The hinges can easily be removed from the pockets and re-shaped to follow the contour of the leg. The brace is made in neoprene, a material that provides compression and stabilization around the knee. Velcro closures make the orthosis easy to adapt and adjust. This orthosis is available in extra large sizes, 2XL-4XL. The orthosis is 40 cm long.

Indications: Stabilization of knee joint, post trauma and post operation. Restricting hyperextension.

Contraindications: None known.

Size: S-4XL Universal right/left.
2XL-4XL: King-size.

Material: Latex-Free Neoprene, Aluminum, Nylon, Steel.

Washing instruction: Hand wash max 30°. Dry flat. Secure all hook and loop closures and remove the hinges before washing. Do not use bleach, chlorine bleach or fabric softener as this could impair the function of the material. Do not dry clean. Do not iron. Do not tumble dry.

Measurement:

1. Circumference thighs in cm (about 15 cm above mid-patella).
2. Circumference knee mid-patella.
3. Circumference calf in cm (about 15 cm below mid-patella).
